ABSTRACT

Scrub made from natural incidents which is needed for today's generation of all artificial and containing harmful chemicals.

I. INTRODUCTION

In today's world , the pace of life has increased by great margins. This has caused people to use artificial products for day to day purposes. One such place is for beauty and care. People use synthetic beauty products made up of chemicals. The main reason behind people using artificial products over natural products is cost effectiveness as well as ease of use. However these products harm the skin over a long period of time. Hence it is necessary that people shift towards natural products for better results in the long run.

For this we need to make sure that these products are capable of competing with the artificial products available in market The main reason why people still prefer artificial products is their ease of use. Another drawback is that organic products are often more expensive than natural products. So our aim is to make an organic face scrub which satisfies all these conditions.

2.EASE OF USE

1. It can be made easily.
2. It can be made anywhere
3. Not harmful to skin

3.Funtion

The basic function of face scrub is to remove the dead cells this process is known as exfoliation, basically scrub has small beads which gently rub your skin. In our scrub sugar crystals act as the beads which remove the old skin and facilities the production of new skin cells, which brings glow to the skin and brings up the original tone of the skin

Our product also contain alovera which moisturizes skin without the greasy effect also slows down the ageing of the skin .The alovera contain beta carotene ,vitamin c and vitamin e which are very beneficial for our skin , it also contain hormones like auxin which helps wound healing and is anti-inflammation and gibberellin which facilitates the growth for new skin .Apple in our scrub contain vitamin c ascorbic acid copper and vitamin a which gives glow to our skin , neem in our product moisturizes our skin and kills germs and multani mittie contain inorganic elements such as

magnesium silica, quartz, calcium ,iron ,calcite and dolomite ,glycerin moisturizes the skin and makes skin soft and smooth

In all our product contains alovera, sugar crystal, apple, multani mettie, neem, almond, glycerin. The main reason why we included these increments in our product, that they contain so important factor those are very important for our face.

4. Table

Components	Contents	Benefits
